

Degen Haus Whitepaper

Degen Haus Whitepaper

Have a read, see what we're all about!

Introduction

Degen Haus is a place that should have been here years ago. Are you sick of teddy bear/dog/cat memes and other regurgitated crypto-themes? Time for something unique and different. That's where Degen Haus comes in!

Mission

On the face of it, we may look like a noisy, raucous, carefree, casual, cheery bunch of people. And we are! But underneath the veneer of this laid back front, we are a serious bunch of investors, developers and administrators whose only aim is to make Degen Haus one of the most recognized decentralized exchanges not only on Fantom but across a lot of other chains.

Our passion is perhaps best captured in this impromptu message from Dr. Haus (one of our investors) to the [Telegram group](#) early in the project's existence:

I want you guys to remember as we sail this ship to the land of FREEDOM. The ability to discover ourselves and do what we want. We may be the captains on this ship but you as the community are the wind in our sails, you are the ocean, you are the ship. Without THIS BADASS COMMUNITY, we are nothing. The most integral part of this entire project IS YOU - YES, YOU READING THIS! You are what this is about. WE are strong together and WE ARE GONNA MAKE IT!!

Origins/lore

The idea for Degen Haus kind of just happened, talking sh*t over a bowl, "what if ... you know?" I mean, who doesn't want to have a bank selling bags of blow? We wanted a place where all the degenerates could feel at home.

The second time me and Charlie got high we smoked a half ounce of \$DOPE between us- safe to say we blew the hinges off the gateway drug. We started growing and selling our own pretty quick: cones, notes and burner phones, man. And f*ck yeah we smoked the product! We didn't walk or stagger ay - we billowed places under a permanent cloud, red eyes like f*ckin' laser beams. We were makin' bank, too; spending most of it on munchies and Xbox games but I mean, we were kids. It was a pretty good gig.

Of course, the problem with \$DOPE is you're still you, still earthbound and anchored, you know? But \$TRIP, man.... every \$TRIP is a f*ckin' red pill- welcome to the real, motherf*cker, ready or not. I've seen the origami universe unfold, man - I've seen the third dimension undone. I've heard the baseline beat in 4/4 time - that chemical chant that drives the tides to paint the trees green and bones red - and it's the same f*ckin' river, man, it's just... folded up. Like, we're all lookin' at the world inside out ... you know? Nah, you don't get it, not yet. You wanna understand? The truth? Find a beanbag and take a \$TRIP, man.

Now \$TRIP will show you the truth, and that's beautiful, but hey - trust me - you don't want an existential crisis every Friday night. You wanna party! And if you wanna party? If you wanna float like a butterfly, sting like a bee, and f*ck like a horse? You want \$BLOW. There's nothin' like it, man. Oh, and you wanna be rich? Deal \$BLOW. You want literal f*cking porn-stars suckin' your d*ck just for somethin' to do? Trust me. Trust me... \$BLOW.

Let me lay it out for you: \$DOPE will free your mind, \$TRIP will free your soul, and \$BLOW will crank your body into f*ckin' overdrive... And there you have it, man: the holy trifecta.

Degen Roadmap

Quarter 4 2021

- Design and Implementation of Degen Haus EcoSystem
- Initial Investors Group
- Build Degen Exchange and Farms
- Create website
- Build Content Management System for Project
- Content Media Officer Employed for Project
- SEO and Linking
- Animations Media SVG files and other Graphics
- Start Socials
- Build up Networking
- Whitelisting on Spiritswap on launch
- Pre Launch Tokens and distribute
-

- Apply to CMC and CG for listing
 - Exchange Launch
 - Launch 01/12/2021 - 10/12/2021
 - Community Support after Launch
 - First Official Launch Party with Prizes and giveaways
-

Quarter 1 2022

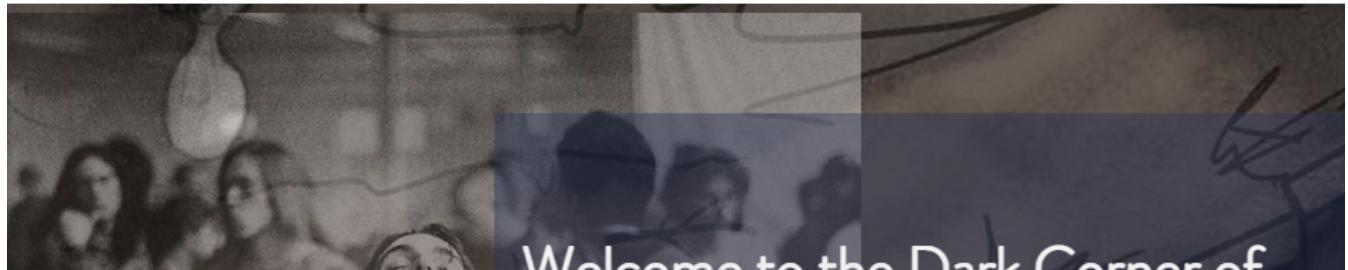

- Dex Launch after Delayed Testing
 - Pools and single staking of tokens
 - Expand to 2nd network
 - AMA on Telegram chat
 - Tutorial Videos youtube
-

Quarter 2 2022

- Actively promote Farming opportunities to other Tokens
- AMA on Telegram chat
- Tutorial Videos youtube
- Usecase of Tokens TBA with P2E NFT game and Hi/Low game planned
- Like to be in 2-5 Networks by this stage Cross Chain Bridging

Degen Haus DEX

A walkthrough of the DEX

Go to <https://www.degen.haus/> and click here to enter the DEX

Home

The home page of the DegenHaus website. It features a sidebar with links like "Degen Home", "Trade", "The Grow Room", "The Stash Haus", "Info", "More", "GitHub", "Whitepaper", "Main Site", "Degen Blog", "Story", "YouTube", and "Haus Party Form".

- A: A red box highlights the sidebar menu.
- B: A red box highlights a "Harvest all" button in a central box.
- C: A red arrow points to the gear icon in the top right corner.
- D: A red arrow points to the "Top Degen Pools" section.
- E: A red box highlights a summary box showing metrics: Total Value Locked (\$1.5 million), Total supply (46,257), Burned to date (4,906), Market cap (\$260 thousand), and Current emissions (0.025/block).

TRIP – Its far out man!

Trip token is the lifeblood of our Haus, and every good degen loves a trip. Earn Trip In The Growroom, or single stake in our Stash Haus

[Enter App](#) [More information](#)

Total Value Locked **\$1.5 million** | Total supply **46,257** | Burned to date **4,906** | Market cap **\$260 thousand** | Current emissions **0.025/block**

Trade

Swap tokens or provide liquidity

Exchange (Swap)

Use this if you want to swap one token for another

Overview of swap functionality

How do I swap one token for another?

1. Choose the token you want to swap from (A)
2. Choose the amount you want to swap (click "MAX" if you want to swap all the available balance in that token) (B)
3. Choose the token you want to swap to (C)

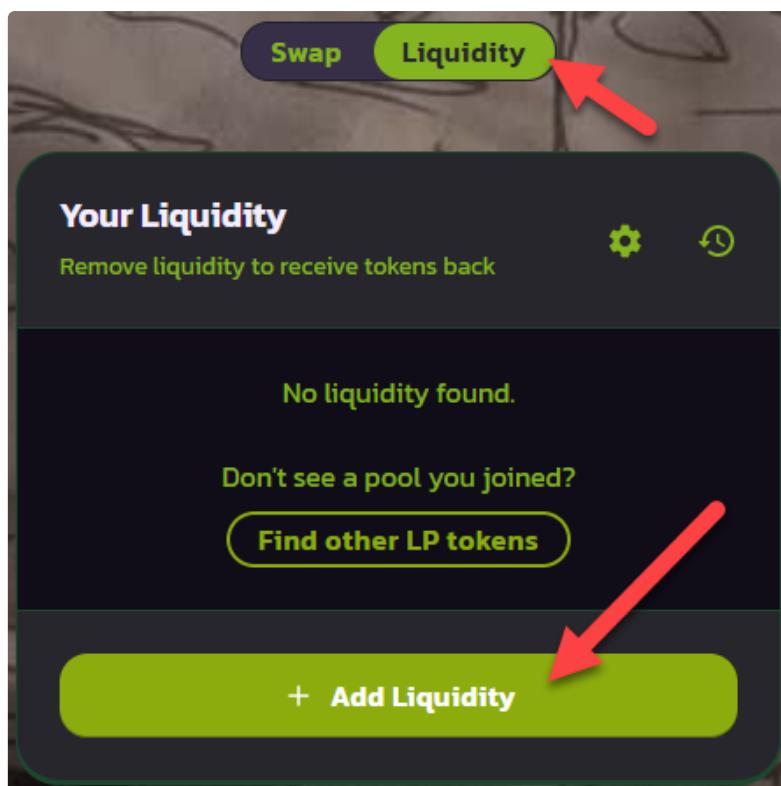

4. You will see the details of the swap, i.e., how many tokens you will receive in (F)
5. If you are happy with the rate, click "Swap" (D)
 1. Note: if you're doing this for the first time, you may need to approve the swap first
6. You may need to adjust the slippage settings for **\$DOPE** (5.5%) and **\$TRIP** (10.5%) transactions

Liquidity

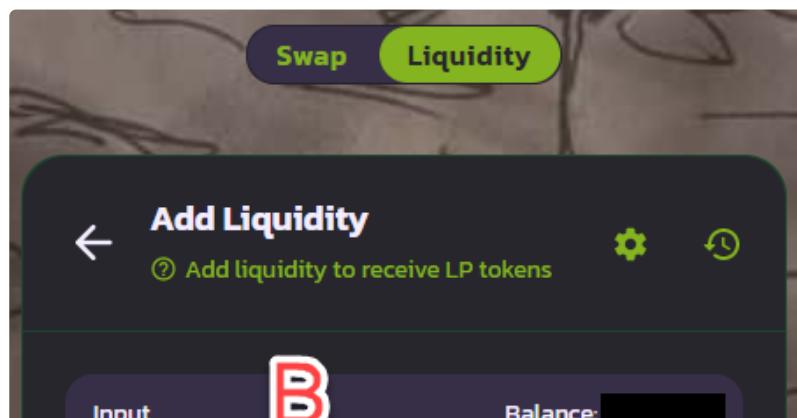

Used to either create a liquidity pair or to break a liquidity pa

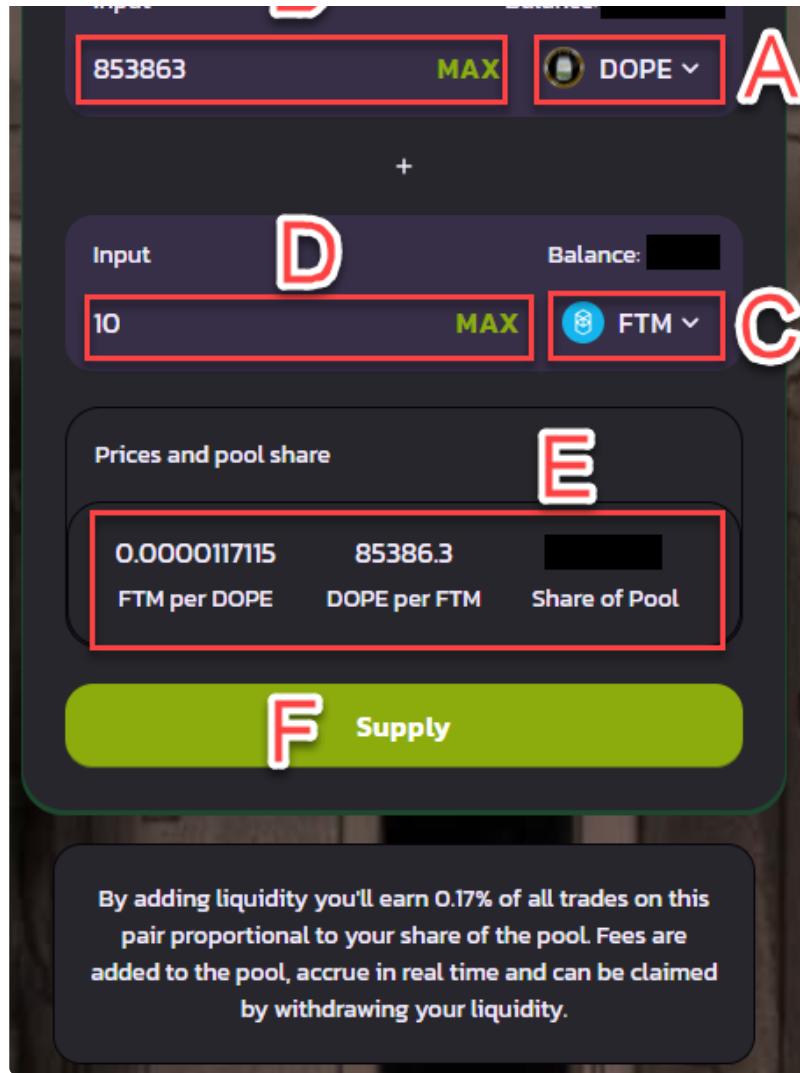

Adding a liquidity pair

For the Grow Room, you need to provide liquidity in the form of LP tokens. To create an LP token, you nee to perform the following steps:

First, click "Add Liquidity".

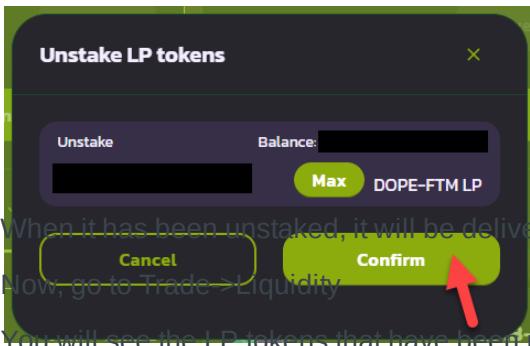

1. Select tokens A/B (**A/C**)
2. Select the quantity of token A you want to provide in the LP (choose max if you want to use the entire available balance) (**B/D**)
 1. Note: selecting one balance automatically calculates the balance that would be required for the other token based on the composition of the LP
3. Once the tokens and balances are selected, you will see the prices per token and your share of the pool in (**E**)
4. Once you're happy with the details, click "Supply" to create the LP token (**F**)
 1. Note: if you're doing this for the first time, you may need to hit approve twice

Breaking a liquidity pair

1. You would first need to unstake the LP token in question in the Grow Room

2. When it has been unstaked, it will be delivered to your wallet
3. Now, go to Trade > Liquidity
4. You will see the LP tokens that have been unstaked
 1. Note: if no LP tokens have been unstaked, it will say "No liquidity found"
5. Confirm
6. Once the transaction has gone through, you will see the individual tokens in your wallet

The Grow Room

Where yield farming happens

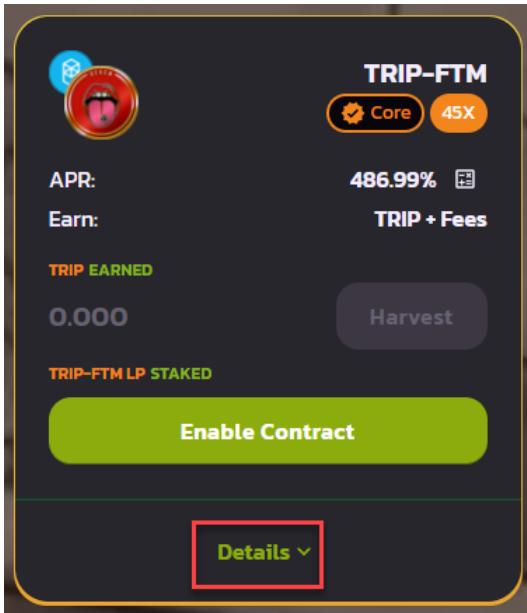

Overview of the Grow Room

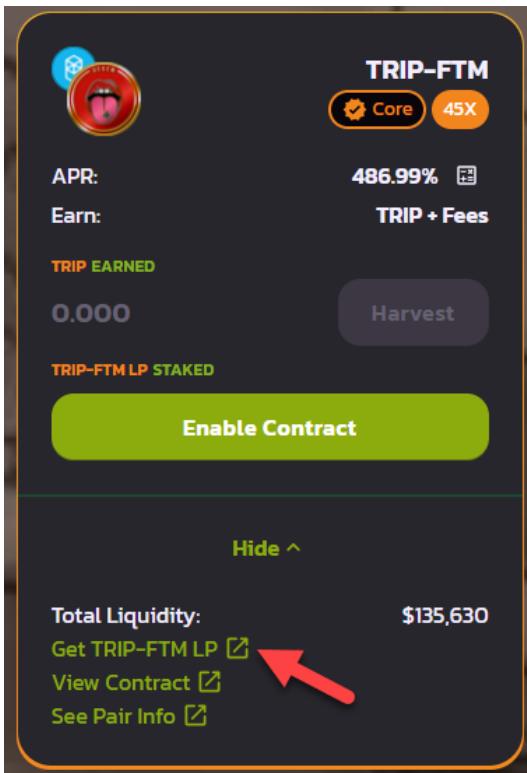

How to stake

Stake your LP tokens and earn rewards in \$TRIP

1. Choose the pair you want to provide liquidity for (we use TRIP-FTM in this example)
2. Click "Details"

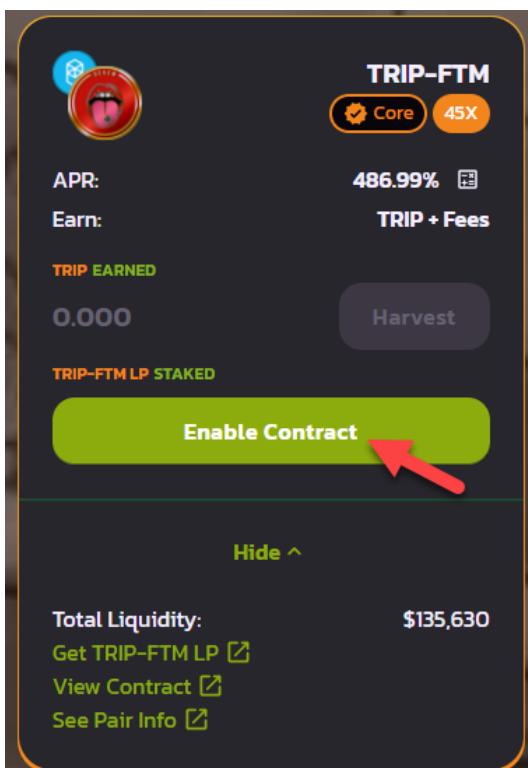

3. Click "Get TRIP-FTM" LP

4. You'll be taken to the "Add Liquidity" page
5. Add liquidity as explained [here](#)
6. Click "Supply"
7. Now you'll be taken back to the Grow Room. If not, go back to the Grow Room after you have confirmed that the liquidity token has been delivered to your wallet

8. Click "Enable Contract"

9. Now stake your LP tokens (click "Max" if you want to stake the entire available balance in your wallet)

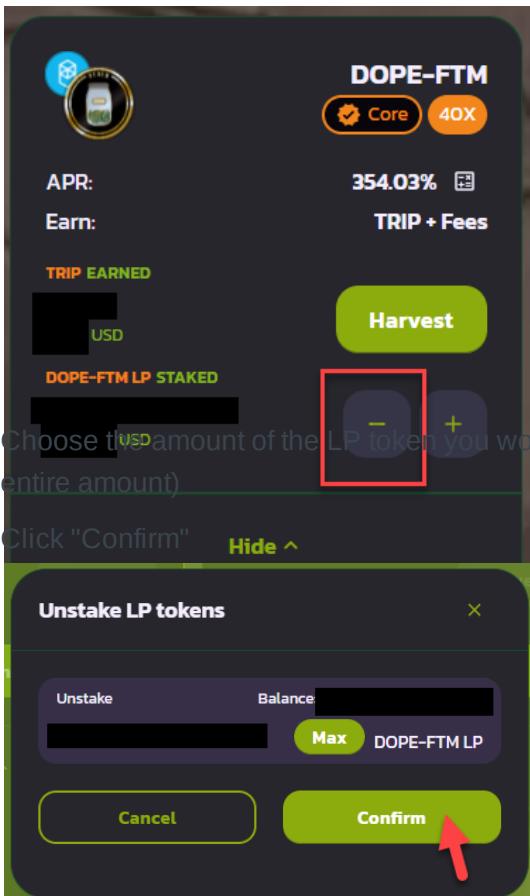

10. Click "Confirm"

11. Once staked, you will begin to collect \$TRIP rewards with every block added to the blockchain

How to unstake

Remove your staked LP tokens

1. Click the "-" sign

2. Choose the **USD** amount of the LP token you would like to unstake (click "Max" if you want to unstake the entire amount)
 3. Click "Confirm"
4. Once the transaction is confirmed, you should have the LP token delivered to your wallet
5. If you want to break the LP token into its constituent tokens, follow the instructions [here](#)

Reward calculations

How the APR percentages are calculated

Introduction

Grow Room APR calculations include both:

- **LP rewards APR** earned through providing liquidity
- **Farm base rewards APR** earned staking LP Tokens in the Farm.

When LP tokens are staked in the Grow Room to earn **\$TRIP**, liquidity is being provided to the liquidity pool. Therefore LP rewards are earned.

Calculating farm base reward APR

The **Farm Base APR** is calculated according to the farm multiplier and the total amount of liquidity in the farm - this is the amount of **\$TRIP** distributed to the farm.

We take the example of the TRIP-FTM pool:

- The price of **\$TRIP** is \$5.36
- This pool receives 300 **\$TRIP** daily
- The total LP for this pool is \$132465

The farm base APR is then calculated as (daily allotment * 365 / total LP) * 100 = $636768 / 132465 * 100 = 480.70\%$

Calculating LP Reward APR

Additional to the farm base reward, staking generates LP rewards for providing liquidity. To calculate LP rewards, the following values are required (go to Info->Top Pools):

#	POOL	VOLUME 24H ↓	VOLUME 7D	LP REWARD FEES 24H	LP REWARD APR	LIQUIDITY
1	WFTM/TRIP	\$35.73K	\$214.57K	\$60.73	13.96%	\$136.29K

1. Use the 24H volume to calculate the **fee share** of liquidity providers in the pool (based on the 0.17% trading fee structure): $\$35730 * 0.17 / 100 = \60.741
2. Next, use that **fee share** to estimate the projected **yearly fees** earned by the pool (based on the current 24h volume): $\$60.741 * 365 = \22170.465
3. We can now use the yearly fees to calculate the **LP reward APR**: That's **yearly fees** divided by **liquidity**: $(\$22170.465 / \$136290) * 100 = 16.26\% \text{ LP reward APR}$ (note: this is close to but not exactly the LP reward APR shown in the image above because of instantaneous changes in the DEX which may take time to get reflected on the information page)

Calculating the overall APR

The APR shown in the Grow Room is then the sum of the farm base reward APR and the LP reward APR, i.e., $480.70 + 16.26 = 496.96\%$

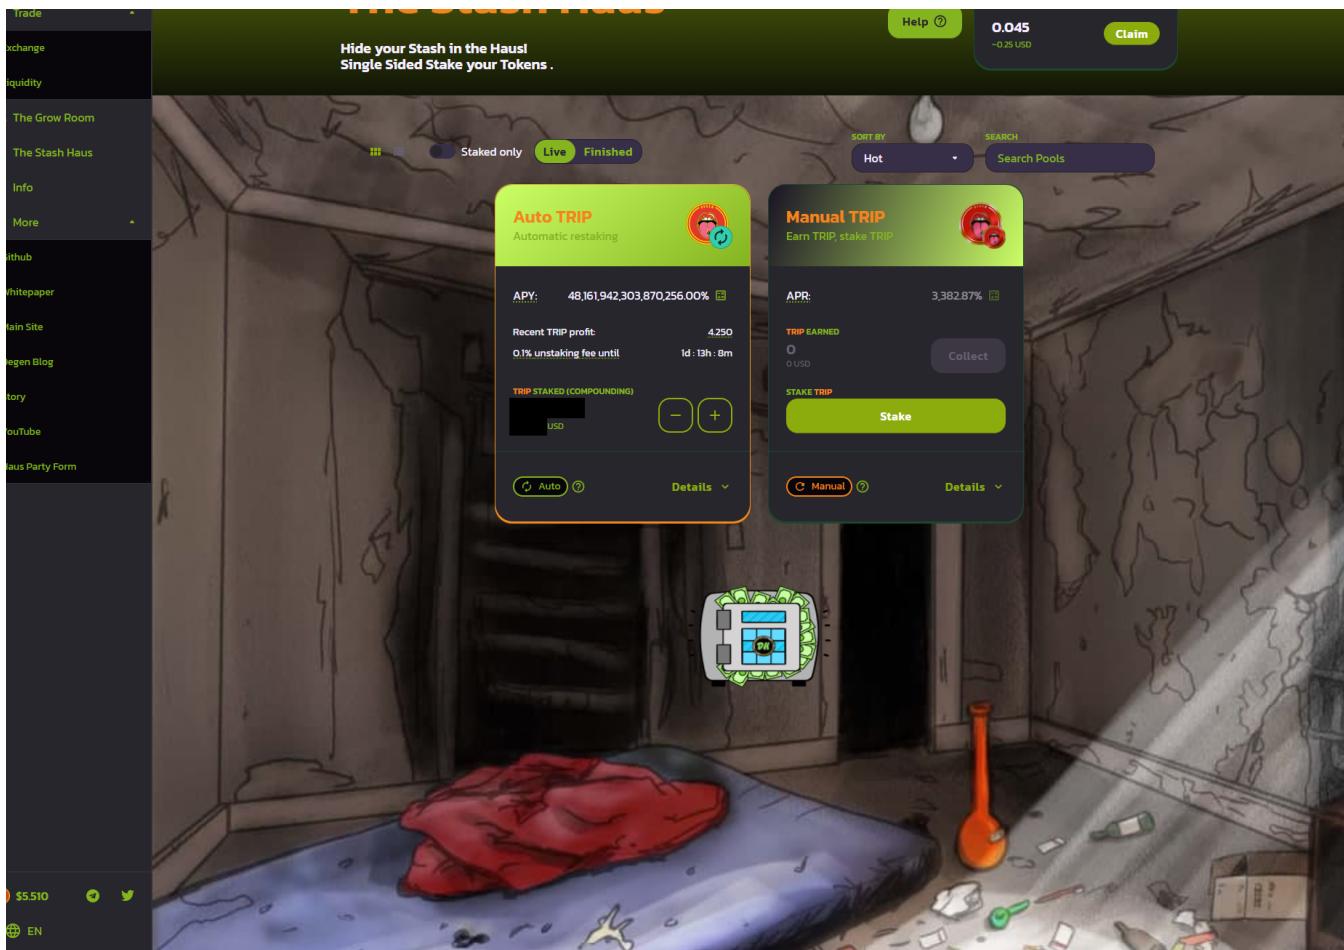

The Stash Haus

Stake **\$TRIP** to earn **\$TRIP**

Introduction

Stake your **\$TRIP** reward tokens to earn more **\$TRIP** reward tokens

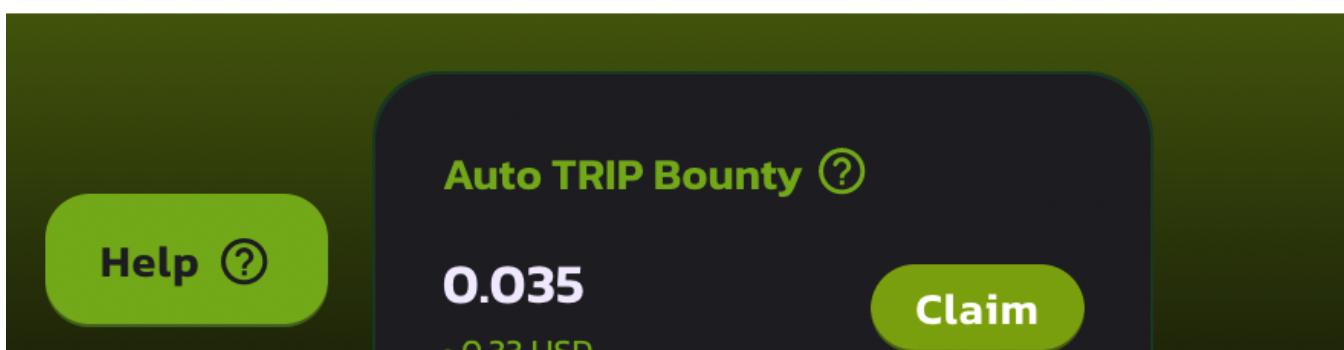

How to stake/unstake

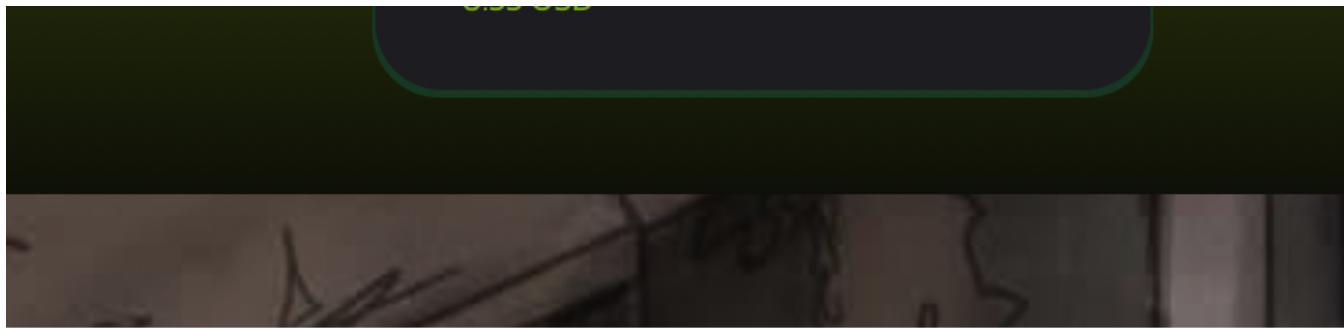

To stake, follow the instructions [here](#). To unstake, follow the instructions [here](#).

Auto TRIP pool

What is the Auto TRIP Bounty

This applies only to the Auto TRIP pool. This bounty is given as a reward for providing a service to other users. Whenever you successfully claim the bounty, the Auto TRIP pool's compounding function is activated for everyone.

The current value of the bounty

STAKED Auto TRIP Automatic restaking Recent TRIP price 0.13791 ⓘ ~1.33 USD

Manual TRIP Earn TRIP stake TRIP TRIP Earned 0.0 0 USD

Claim Bounty

You'll claim 0.0354824 TRIP ~0.34 USD

Pool total pending yield 14.193 TRIP

Bounty 0.25%

Confirm

What's this? ⓘ

This bounty is given as a reward for providing a service to other users. Whenever you successfully claim the bounty, you're also helping out by activating the Auto TRIP Pool's compounding function for everyone.

Auto-Compound Bounty: 0.25% of all Auto TRIP pool users pending yield

The bounty is calculated as 0.25% of all Auto TRIP pool stakers' pending yield

When does the Auto TRIP pool compound happen?

1. When the [bounty](#) is claimed
2. When a deposit to or withdraw from this pool is made

Performance fees for the Auto TRIP pool

A performance fee of 2% is subtracted from your earnings each time the pool is automatically compounded. The [\\$TRIP](#) collected via the [unstaking fee](#) and performance fee is **burnt every week** as part of the regular

[\\$TRIP](#) token burns.

Unstaking fee for the Auto TRIP pool

An unstaking fee of 0.1% applies if you unstake within 3 days of staking. Unstaking thereafter does not incur any fee. The 3-day timer resets every time you stake more [\\$TRIP](#) in the Auto TRIP pool.

Why is the return given as APY instead of APR for the Auto TRIP pool?

The Auto TRIP pool is compounded [multiple times a day](#). This means that every time a compounding event happens, the reward earned up to that point in time is added to the staked amount. The next compounding event therefore yields a reward earned on this bigger staked value. As a result of this, the compounding frequency needs to be taken into account when calculating the yield. [Here](#) is a useful APY calculator.

Manual TRIP pool

Staking in the manual pool deposits DEGENbar tokens in your wallet. Read more about these [here](#).

General questions about Stash Haus pools (for the future)

I can't find the The Stash Haus Pool I was staking in!

You should be able to find the The Stash Haus Pool under the “Finished” tab on the The Stash Haus Pools page.

By selecting “Staked Only”, it will make it easier to find your assets.

Why did my earned tokens go to zero after staking/unstaking?

Don't worry! They're in your wallet already.

Whenever you stake or unstake from a The Stash Haus Pool or farm, your earned tokens get harvested and sent to your wallet. As they are in your wallet and no longer staked in the pool, the pool value appears as zero.

How is APR for The Stash Haus Pools calculated?

APR = Annualized rewards (USD) / User funds staked in The Stash Haus Pool (USD) * 100

As a basic example, let's take a 60-day pool with 300,000 USD worth of rewards, and 3,000,000 USD worth of TRIP staked in it.

The APR fluctuates as more [\\$TRIP](#) is staked by users and the price of [\\$TRIP](#) itself fluctuates.

Calculation

Amount

Total rewards to distribute (USD value)

300,000 USD

Distribution period

60 days

Daily distribution

$300,000 / 60 = 5,000$ USD daily

Annualised rewards (USD value)

$5,000 * 365 = 1,825,000$ USD

Value of \$TRIP staked by users in pool (USD value)

3,000,000 USD

APR

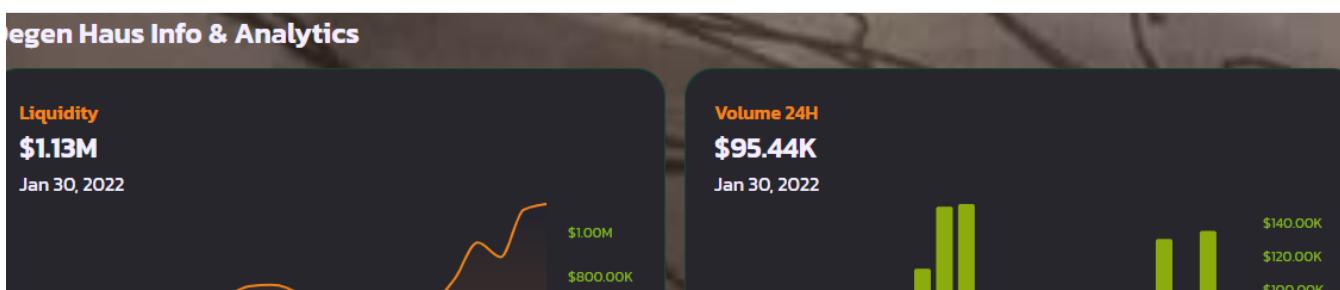

$(1,825,000 / 3,000,000) * 100 = 60.833\%$ APR

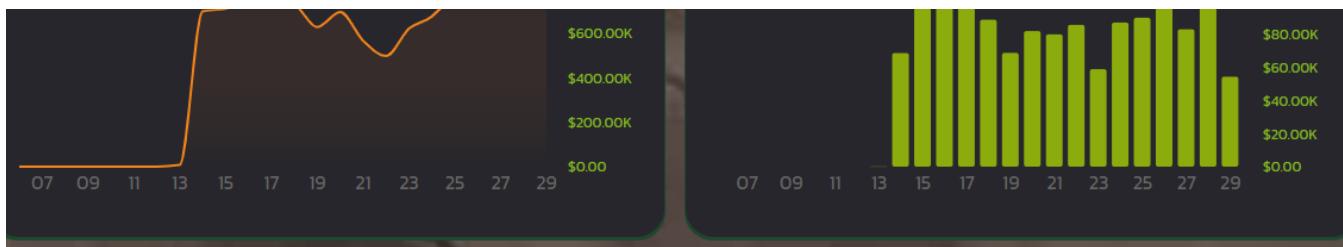

What does the “End” number on my The Stash Haus Pool refer to?

This shows the number of blocks left until the rewards for that pool stop being distributed. Once the pool has reached that block, you should unstake your tokens, because you won't be receiving any rewards after that.

Tokenomics

- Supply: 17k starting supply; uncapped
- Emission rate: 0.025 per block (2455 \$TRIP daily)
- Burn: see [below](#)

- Expansion rate: currently **inflationary** due to uncapped supply and emission rate
 - Note: by controlling the emission and burn rates of \$TRIP, the token can be made deflationary if desired. There are, however, no such plans in place currently. Read more [below](#).
-

Controlling the supply of \$TRIP

No hard cap

Community members often point to the inflationary nature of \$TRIP as a cause for concern. While the team certainly understand the wish for a hard cap, there's a big reason we don't expect to set one in the near future:

\$TRIP's primary function is to incentivize providing liquidity to the exchange. Without block rewards, there would be much less incentive to provide liquidity.

Keeping inflation in check

The team aims to **make deflation higher than emission** by building deflationary mechanisms into all our Degen Haus future updates. The goal is for more \$TRIP to leave circulation than the amount of \$TRIP that's produced.

Reducing block emissions

By reducing the amount of \$TRIP generated per block, inflation can be slowed. This has already been done once: during initial testing, the emission of \$TRIP was reduced from 0.05 \$TRIP per block to 0.025 \$TRIP per block. However, it is not expected that this will be done very frequently for the same reason that a hard cap is undesired: provisioning of liquidity needs to be incentivized and that cannot happen if there is little or no \$TRIP being emitted.

Burns

- Manual burning at opportunistic times.
 - Automatic burns to be built into many Degen Haus products (e.g., a 10% burn of TRIP spent on future lottery tickets).
-

Transaction fees

- 10% fee for any sell or buy transaction (transferring \$TRIP from one wallet to another is a tax-free transaction):
 - 3% marketing and development
 -

- 2%: [insurance](#)

DegenBar token

Receipt for the manual Stash Haus pool

What is the DegenBar token?

The DegenBar Token is deposited into your wallet when you interact with the **manual "Stake TRIP, Earn TRIP"** Stash Haus pool.

It is a voucher indicating how much **\$TRIP** has been staked in the pool.

It is automatically returned when **\$TRIP** is unstaked from the pool.

Important 1: Do not sell your DegenBar tokens! They need to be returned for **\$TRIP** to be successfully unstaked. The amount of DegenBar tokens that need to be returned must match the amount of **\$TRIP** that has been staked.

Important 2: The DegenBar token holds no value. Having extra DegenBar tokens than what has been staked will not result in extra **\$TRIP** tokens being returned to the wallet when unstaked.

Our parties are the talk of the chain. Find out more about them!

What are parties?

Airdrops are SO last year ... nobody wants to register, wait weeks or months and hope to actually receive something. Nah, we don't roll like that. Join us in [Telegram](#) and hit one of our random Degen Parties, where we will bring a bag of the good stuff to split with all attendees, because sharing is caring, man.

VIP parties

Owning a [Tick Tok to Splifftoff \(\\$DOPE\)](#) NFT or a [TripRAT \(\\$TRIP\)](#) NFT gives you access to VIP parties. On account of the fact that only a limited number of NFTs are available, the share of the reward pot per head is bigger.

How often do parties take place?

We host up to 3 parties **a day**.

What is the schedule for the parties?

Rule #1 of Degen Haus: do not ask about the next party! There is no clock in the Degen Haus!

How long does a party last?

30 minutes.

What are the party rules?

When a party begins, we will pin the post on our [Telegram](#) group. Read the post carefully - it will contain instructions regarding the task you must perform. No two parties are the same. You will be asked to fill a form out to indicate that you have performed the required task. We will post warnings when the party is about to end. [Once the party has ended](#), the form will be closed and submissions to the form will not be accepted. Finally, remember: [cheating](#) will not be tolerated!

What is considered cheating?

1. Deliberately submitting dead/broken/wrong links.
 2. Using multiple wallets for the same [Telegram](#) handle.
 3. Using multiple [Telegram](#) handles for the same wallet.
 4. Using multiple Twitter handles for the same wallet or [Telegram](#) handle.
 5. Repeatedly submitting bogus responses.
 6. Taking part in a [VIP party](#) when you do not own an NFT which gives you access to VIP parties.
-

When is a wallet blacklisted?

1. When the wallet has been detected as [cheating](#).
 2. When the wallet has [sold more \\$DOPE than is allowed](#).
 3. When the wallet is detected as being part of a money-laundering racket/ring.
 4. When the owner of the wallet is ejected from the [Telegram](#) group for exhibiting violent/hateful behavior.
-

How big is the party reward?

There is no fixed number. The reward pot for every party is the same and equally distributed to the legitimate participants of the party in question. Naturally, [VIP parties](#) have a lower attendance than regular parties and so the reward per head for a VIP party is typically larger than that for a regular party.

Can I sell my party rewards?

We give out [\\$DOPE](#) as a party reward. It is our intention that reward receivers hold on to their reward rather than immediately sell it. Immediately selling a reward generates sell pressure on the token which is counter-productive for Degen Haus as this makes it harder to attract new investors. Therefore, to prevent this from happening, we have set limits regarding how much reward [\\$DOPE](#) can be sold. These are:

- Up to 20% of total [\\$DOPE](#) reward received for a wallet that **does not hold** a [Tick Tok to Splifftoff \(\\$DOPE\)](#) NFT or a [TripRAT \(\\$TRIP\)](#) NFT.
- Up to 30% of total [\\$DOPE](#) reward received for a wallet that **does hold** a [Tick Tok to Splifftoff \(\\$DOPE\)](#) NFT or a [TripRAT \(\\$TRIP\)](#) NFT.

The Haus reserves the right to change these percentages as it sees fit.

What happens if I sell too much \$DOPE?

We have a sophisticated system in the backend which analyzes on-chain data. If a wallet is detected as selling too much \$DOPE, it will automatically be blacklisted and barred from receiving party rewards until [remedial measures](#) have been taken.

Can I take my wallet off the blacklist after selling too much \$DOPE?

Yes. First of all, approach one of the admin members on [Telegram](#) and ask them what needs to be done. They will then reply to you with a message which looks like:

```
Party income: 29077500; Non-party income: 4828519.9551645545; Total  
outgoing (excluding dead address): 25717044.5499172 (71.8374158533321% of  
party income); Minimum buy for unblacklisting: 12165274.594752643
```

The value marked in bold is the minimum amount of \$DOPE that will be need to be bought in order for this wallet to be removed from the blacklist. Once the appropriate quantity of \$DOPE has been purchased, the wallet will automatically be removed from the blacklist and may resume taking party in parties.

Can I sell \$DOPE which I bought using my own crypto?

What you do with the \$DOPE you bought using your own crypto is your own business. Hodl it, sell it, we don't care.

I took part in a party. Why have I not received a reward yet?

Please note that the sole purpose of our existence is not to conduct parties. We have a full-blown decentralized exchange to run, marketing to do, partnerships to take care of and a backend to run. On top of this, we host up to 3 parties a day. We receive hundreds of responses per party and before we can disburse funds, we need to weed out the cheats and incorrect responses. All of this costs a lot of time. Typically, we ~~disburse bags once every 3 days~~.

Blacklisted wallets

List of wallets which have been blacklisted

Introduction

If your wallet has been blacklisted (see blacklisting reasons [here](#)), it will appear in the list below. If your only offence has been to sell too much **party \$DOPE**, it is possible to remove your wallet from the blacklist. See instructions [here](#).

List of blacklisted wallets

How do I check whether my wallet is on the list?

The list is very long. The best way to check if your wallet is on the list is to copy your wallet address, and use the browser's "find" function (ctrl+f if you're on a PC; "find in page" if you're on a smartphone).

Is the list up-to-date?

Yes, the list is updated automatically by our backend.

NFTs By Degen Haus

Details regarding all the Degen Haus NFTs and their use-cases

NFT: Tick Tok to Splifftoff (\$DOPE)

Early-adopter NFT related to \$DOPE

[MINT NOW!!](#)

Price: 42 FTM

Availability: only 300

Limitations: maximum 2 NFTs per wallet

Contract: 0xA777D6f2a9d73Fdf3123CAB9b08acAE688e71512

Degen Haus has its first NFT - Tick Tock to Splifftoff - available for purchase. This offer is only open until the end of January 2022.

This NFT grants you access to VIP parties, special competitions and earns you a daily bag of \$DOPE (note: as more NFTs get sold, the size of the daily bag reduces).

If you miss out on our first release, then fear not as our second design will offer a great reward incentive as well.

Future use: This NFT will unlock bonus multipliers in the farms. There will also be other rewards and bonuses for owning an early adopter Tick Tock to Splifftoff NFT. These will be announced closer to the release date.

[MINT NOW!!](#)

NFT: TripRAT (\$TRIP)

Early-adopter NFT related to \$TRIP

[MINT NOW!!](#)

Price: 25 FTM

Availability: only 500

Limitations: none

Contract: 0x61af4d29f672e27a097291f72fc571304bc93521

This NFT is related to the \$TRIP token.

This NFT grants you access to VIP parties but does **not** yield a daily bag as the [\\$DOPE NFT](#) does.

How to import your NFTs to MetaMask

Note: this only works for **MetaMask mobile**

Why would I need to import an NFT to MetaMask?

If you want to transfer your NFT to another wallet, this is a convenient way to do so.

Instructions

1. Open MetaMask
2. Click "NFTs"
3. Click "Import NFTs"

Import NFT

Fantom Opera Network

Address

0x...

ID

Enter the collectible ID

CANCEL

IMPORT

4. Enter the appropriate NFT contract address
 1. \$DOPE: 0xA777D6f2a9d73Fdf3123CAB9b08acAE688e71512
 2. \$TRIP: 0x61af4d29f672e27a097291f72fc571304bc93521
5. Enter the ID of the NFT you own
6. Click "Import"

Graffiti Wall

Indoor Graffiti?? That's Real Classy!

Meet the team:

Devs

- Cheyne: AKA Smokes Codes - Dev, admin, F*cking legend, the real brains that makes all this sh*t work
- Me AKA Oldmate: Just a stoner guy with good mates, in the right place at the right time
- Investors
 - Vicky: our honorary maSCOT
 - Brand: AKA Dr Tripps - Degen, admin, angel investor, ol' lantern balls
 - J: AKA Dr Haus - Degen, admin, angel investor, will eat your phone when drugged
 - Big Irish: AKA Lil tripod - Degen, admin, angel investor, the only man longer than he is tall
- Admin
 - R\$M\$: AKA P Haze - Degen, admin, gif Gatlin and just a decent bloke all round
 - ZB: AKA Giggle Duster - Degen, admin, Kim Jong ZB, Verminator's keeper, Rose's dirty little secret
 - Nikola: AKA Sektor - Degen, admin, quality assurance department, Discord's keeper, mad coder
 - Yemtop: AKA the African legend - Degen, admin, gif Gatlin, keeps an entire continent satisfied
 - Euler: AKA The Lyrical Miracle - Degen, admin, silver-tongued monologue man
 - Leonard: AKA Pimp Daddy - Degen, admin, will stab you for your \$DOPE bag
- ?????: ??????, ??????? (redacted)
- **YOU:** AKA whatever the f*ck you want to go by - Degen, Legend, Mad c*nt!

The Team is large, hand picked and they all play an important role in making this work.

I might be the **\$DOPE** man, but it's only through the hard work of the team (especially my brother from another mother, Cheyne) that we can keep on bringing those party baggies to you.

Party on dudes and dudettes ☺

Add Fantom network to MetaMask

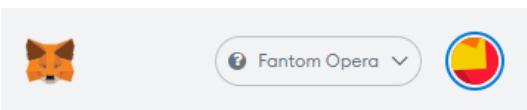

How to add FTM Chain to your MetaMask wallet

The [MetaMask wallet](#) is recommended.

Before being able to buy [\\$DOPE](#) or [\\$TRIP](#) and use in our exchange, the MetaMask wallet needs to recognize the Fantom network.

To do this

1. open the MetaMask wallet: Settings->Networks

Settings

X

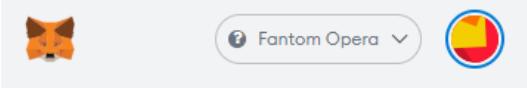

Security & Privacy

Privacy settings and wallet Secret Recovery Phrase

2. Click "Add Network"

3. Use the following settings:

< Networks

X

Network Name

Fantom Opera

New RPC URL

<https://ftmrpc.ultimatenodes.io>

Chain ID ⓘ

250

Currency Symbol (Optional)

FTM

Block Explorer URL (Optional)

<https://ftmscan.com>

1. Network name: Fantom Opera

2. New RPC URL: <https://ftmrpc.ultimatenodes.io/>

3. ChainID: 250

4. Symbol: FTM

5. Block Explorer URL: <https://ftmscan.com>

4. The setup is now complete
